

UWE HAUCK

Director Product Management

Uwe Hauck is Director, Global Technology & Innovation based in Berlin. He is globally responsible for the advancement of HEMS technologies including battery connection and protection systems. In this function he oversees future trends such as electromobility. Together with the automotive and electronics industry he develops road maps for TE Connectivity's (TE) High Voltage Automotive portfolio.

Uwe joined TE in 1991 as Kaizen Manager for relays and optimized production lines at home and abroad. Later, he moved to EMEA Technical Marketing. His field of responsibility included the specifications and development of electromechanical and electronic components, for which he was responsible in his role as Global Product Manager.

He earned a degree in Industrial Electronics and has more than 20 years of experience in automotive technologies, including relays, electronic modules and connectors.
